NOTE: The companies on this list are listed alphabetically and will have the corresponding type of service they provide, either “design”, “installation”, “rainwater harvesting” or “Green Roof” marked in the respective columns. Some companies may provide more than one type of service. Please keep in mind that these are professionals who require fees for their consulting or design services. Assistance with completion of the application is considered a reimbursable expense if your application is approved.

If your contractor does not appear on this list, you may still utilize their services. However, you may not submit their associated expenses as part of your Rainscaping budget as they are not eligible for the grant program. If you have a contractor that would like to apply to be on the Rainscaping Small Grants Participating Contractor list, they must contact the Rainscaping Hotline at (314) 577-0202, or rainscaping@mobot.org by July 28th, 2017.

Metropolitan St. Louis Sewer District and Missouri Botanical Garden lists Participating Contractors but DO NOT certify the technical expertise of contractors participating in the program.

If you have questions regarding the program guidelines or application process, please email rainscaping@mobot.org. If you need to speak to someone, please call the general program phone number at 314-577-0202. Additional resources are available online at www.mobot.org/rainscaping and <http://www.projectclearstl.org/get-the-rain-out/rainscaping-small-grants-program/>.
